

Women's Health with HOCATT™ Therapy

LET ME ASK YOU SOMETHING:

What would you say if someone told you that you could slow the hands of time AND lose weight, simply by sitting and relaxing for just 30 minutes a day? Well, they say ''if it seems too good to be true, it usually is''. But for the HOCATT™ it is true! And it's not just good – it's great!

SO WHAT IS THE HOCATT™?

The HOCATT™ is a bio-chamber that delivers a combination of therapies perfectly sequenced to give a gentle, but incredibly powerful treatment, that boosts energy and detoxifies your body down to cellular level. The main therapy is medical Ozone, which is generated from medical grade Oxygen – you can think of Ozone as a Super-Oxygen!

OZONE & WOMEN'S HEALTH

Research shows that the most common health issues faced by women can be treated very successfully with Ozone – it can even be used for gynaecological issues such as endometriosis, ovarian cysts, and vaginitis. Most women have at some stage in their life experienced some form of vaginitis (e.g. thrush), which can be 100% eliminated by Ozone Insufflation[1]. Vaginal Insufflation is recommended for any vaginal yeast/fungal, viral or bacterial infection – many such infections prevent conception and lower fertility, thus Ozone therapy is helping many women achieve their dreams of becoming mothers. Ozone therapy can even treat threatened abortion[2].

HOCATT™ & WOMEN'S HEALTH

The HOCATT™ is specially designed for women's health issues, with an extra ozone generator dedicated to performing OPTIONAL vaginal Ozone-Oxygen insufflations and breast cupping.

Inside the HOCATT™ chamber, the Ozone mixes with the steam and gets absorbed through the skin – making this a **transdermal therapy**. The Ozone steam purifies the skin and removes toxins, enhancing the vitality of the skin. It also treats skin problems, such as eczema and psoriasis.

WEIGHT LOSS & BEAUTY

When it comes to your skin, Ozone is the best therapy for rejuvenation – HOCATT™ therapy:

- Slows the aging process by increasing oxygen delivery to cells.
- Rejuvenates the skin by reducing and smoothing fine wrinkles.
- Stimulates collagen and elastin synthesis – strengthens the collagen layer.
- Strengthens connective tissue, tightens and firms, yet leaves the skin soft and supple.
- Improves elasticity and texture of skin, reduces blemishes and softens acne scars.
- Reduces cellulite.
- Enhances weight loss – burn up to 600 calories per session!
- Turns fat into muscle!
